

**REMARKS**

Applicants respectfully request the Examiner to enter this Second Preliminary Amendment to avoid any objection for multiply-multiple dependent claims. Applicants intend to retain the full scope of protection, *i.e.*, they have no intent to surrender or limit the scope of their claimed inventions.

The amended specification at page 4 corrects the wording consistent with idiomatic English. There is no new matter. See the specification, page 10, first paragraph.

New claim 15 relates to the methodology described throughout the specification and the intention is to avoid new matter. Applicants respectfully direct attention to FIGS. 1-9, and the specification at page 10, *infra*. New claims 16 and 17 likewise relate to subject matter disclosed throughout the original specification.

Favorable action is respectfully solicited.

Respectfully submitted,

FITCH, EVEN, TABIN & FLANNERY
